

**AquaTouch** are leading the way in the textile revolution known as Microfibre. AquaTouch Microfibre is made of polyester/polyamide wedge shaped fibres. The unique construction provides incredible absorption characteristics and amazing softness.

Our Tricot Microfibre Cloths are brilliant for buffing polishes compounds sealants, surface cleaners and waxes. You can dramatically reduce your buff off time, they won't scratch and are machine washable.

We have an exciting range of Automotive microfibre cloths for just about every car detailing use. Whether you are a professional or just a car fanatic Microfibre is a must!

The **AquaTouch** range includes:

- washing & polishing mitts,
- general purpose cloths,
- drying towels,
- chamois,
- application pads and
- specialised glass cloths.

Both premium microfibre and the latest **ULTRA** microfibre product is featured in the **AquaTouch** range.

EXCELLENCE IN VEHICLE APPEARANCE

## Ultra Chamois

A non scratch **Microfibre Chamois** that combines all the best features of Natural and synthetic Chamois. Incredibly absorbent, it can be machine washed with no special container to keep it moist... its stays soft. Say Goodbye to clumsy containers, bacteria, odour.

## Ultra General Purpose Cloth

Ultra General Purpose Microfibre Cloths have a smaller and lighter filament yarn which results in a higher fibre per sq inch count to regular Microfibre. These cloths have increased performance and longer life. They can be used for General Cleaning, Polishing and buffing.

## Ultra Super Soft Cloth

Ultra Super Soft Microfibre Cloths are much softer in feel and texture to normal microfibre cloths and can absorb more than 8 times their weight in water and "grime". The fibre is even smaller and the high weight makes these cloths super absorbent and ideal for polishing and drying. They are perfect for buffing off paint cleaners, carnauba waxes, synthetic polymers and fine mist detailer sprays.

## Ultra Heavyweight Cloth

Ultra Heavyweight Soft Microfibre Cloths are just that, a soft heavyweight microfibre cloth with similar features to the *Ultra Super Soft* cloths but even more effective when buffing thicker waxes and polishes. The "Ultra" of all polishing cloths !!

## Ultra Super Plush Cloth

Ultra Super Plush **Dual** Microfibre Cloths are woven on a special "FBZ" machine, and dual sided, with the plush side being highly absorbent and the low pile side has more static force. As such this cloth covers dual purposes by simply changing the sides. This cloth can be used as a drying cloth, as its the most absorbent microfibre cloth in our range. It can also be used as a general purpose or a polishing cloth depending on which side is used. The 60x90cm version can be used as a drying towel for your car.

## Ultra Glass Cloth

Ultra Microfibre Glass Cloth - *non streak*, use with water only... this is just the *best* glass cloth. Completely lint free and does not shed fibre even if not used properly. and can be machine washed. Simply wet glass surface and buff dry with the Ultra Glass Cloth for a brilliant clean, streak free finish.

## Applicator Pads

Microfibre Applicator Pads - combining safe "pressure point reducing" pads with scratch free microfibre gives very safe application pads for applying automotive polishes, cleaning compounds and fluids.

Microfibre pads are pressure point free which is a plus when used for applying automotive polishes, cleaners and compounds. Machine washable - use again and again.

Available in:

Suede and Tricot

## Ultra Microfibre Wash Mitt

Ultra Microfibre Wash Mitt with elasticised cuff, an excellent soft, gentle but very effective car wash mitt. Bugs and grime can be removed safely without scratching when used with a good shampoo. Machine washable. Never use a sponge again!
